AY 2025-26

WEBINAR ON AI UNLEASHED

(2025-2026)

Event Report

By IEEE SVCE Student Branch
Conducted on 17th February, 2026

CAEFA WORKSHOP BROCHURE

IEEE SVCE Student Branch Presents

WEBINAR ON AI UNLEASHED – INDUSTRIAL TRENDS, SKILLS, AND OPPORTUNITIES

Dr. Santhosh Krishna BV
Professor & Head
Department of Computer Science and Engineering (Data Science)
Bangalore Technological Institute, Bengaluru

Dr. KR Santha
IEEE Counselor, Vice Principal,
Dean Research and Professor

Faculty Co-ordinators
Mrs KS Pavithra AP/EEE
Mrs C Gomatheeswari Preethika AP/ECE
Mr N Suresh AP/EEE

Date: February 17, 2026
Time: 6.30 pm
Online mode

IEEE SVCE STUDENT BRANCH WEBINAR ON AI UNLEASHED (2025-2026) REPORT

The IEEE SVCE Student Branch successfully organized an insightful webinar titled “**AI Unleashed – Industrial Trends, Skills and Opportunities**” on **17th February, 2026 at 6:30 PM** through online mode. The webinar aimed to create awareness among students about the rapidly evolving field of Artificial Intelligence, current industrial trends, essential technical skills, and emerging career opportunities in AI-driven domains.

The session featured **Dr. Santhosh Krishna B V**, Professor and Head, Department of Computer Science and Engineering (Data Science), Bangalore Technological Institute, Bengaluru, as the esteemed guest speaker. The event witnessed enthusiastic participation from around 120 students and faculty coordinators from various departments.

The webinar commenced with a warm welcome address delivered by **Ms. Sai Raksheedha S**, representing the IEEE SVCE Student Branch. She welcomed the esteemed guest speaker **Dr. Santhosh Krishna B V**, IEEE Counselor and Vice Principal **Dr. K. R. Santha**, faculty coordinators, and all the participants who had joined the session. She highlighted the significance of Artificial Intelligence in today’s rapidly advancing technological world and emphasized the importance of understanding industrial trends and opportunities in AI for academic and professional growth.

The gathering was then addressed by **Dr. K. R. Santha**, IEEE Counselor, Vice Principal, Dean – Research and Professor. She encouraged students to actively explore emerging technologies and continuously upgrade their knowledge and skills to meet the demands of the modern industry. Her motivating words inspired the participants to make effective use of such technical sessions for their career development.

Following this, the guest speaker **Dr. Santhosh Krishna B V** was formally introduced to the audience. Dr. Santhosh is a distinguished academician and researcher with over 15 years of experience in engineering education. He obtained his Ph.D. from Anna University, Tamil Nadu, specializing in Biomedical Image Processing using Machine Learning. He has authored 10 textbooks in Communication and Networking and published more than 70 research papers in reputed Scopus and SCI-indexed journals and conferences. He is also a recognized research supervisor under VTU and has delivered numerous invited talks at national and international platforms.

The webinar session was highly informative, interactive, and engaging. Dr. Santhosh began the session by explaining the fundamentals of Artificial Intelligence and how AI technologies have evolved from simple automation systems to Machine Learning and Deep Learning applications. He clearly differentiated between Artificial Intelligence, Automation, Machine Learning, and Deep Learning, enabling students to gain a structured understanding of the hierarchy and functioning of AI systems.

Introduction to Artificial Intelligence Concepts

The webinar session was highly informative, interactive, and engaging. Dr. Santhosh began the session by explaining the fundamentals of Artificial Intelligence and how AI technologies have evolved from simple automation systems to Machine Learning and Deep Learning applications. He clearly differentiated between Artificial Intelligence, Automation, Machine Learning, and Deep Learning, enabling students to gain a structured understanding of the hierarchy and functioning of AI systems.

The speaker further explained the conceptual working of Large Language Models (LLMs) and introduced concepts such as tokenization, embeddings, neural networks, probability prediction, and output generation. These explanations helped participants understand the working principles behind modern AI tools and intelligent systems.

Conceptual Working of Large Language Models (LLMs)

One of the key highlights of the webinar was the discussion on industrial applications of AI, particularly in **Smart Manufacturing and Industry 4.0**. Through a detailed case study, Dr. Santhosh explained how AI-powered predictive maintenance systems are transforming industries. He described how sensors collect real-time machine data such as temperature, vibration, and load, and how Machine Learning algorithms analyze these patterns to predict equipment failures before they occur. The session demonstrated the practical benefits of AI in reducing downtime, lowering maintenance costs, increasing production efficiency, and improving equipment lifespan.

Case Study on Smart Manufacturing using AI

The speaker also emphasized the mindset and skill set required for future engineers in the AI era. He advised students to focus on solving real-world problems rather than merely learning technologies. He stressed the importance of working alongside intelligent systems, combining domain expertise with AI capabilities, continuously adapting to technological advancements, and prioritizing innovation, ethics, and societal impact.

The webinar provided participants with valuable insights into industrial trends, research opportunities, and the practical implementation of AI technologies across various sectors including manufacturing, healthcare, cybersecurity, finance, and automation. The session greatly enhanced students' understanding of how AI is transforming industries and shaping the future of engineering and technology.

Future Engineer's Mindset in the AI Era

The session concluded with an interactive discussion where participants actively clarified their doubts and engaged with the speaker on various AI-related topics. The webinar ended with a formal **Vote of Thanks delivered by the Faculty Coordinator, Ms. C. Gomatheeswari Preethika**, who expressed sincere gratitude to the guest speaker for delivering an enlightening and thought-provoking session. She also thanked the management, faculty members, organizers, and participants for contributing to the successful conduct of the webinar.

Following the Vote of Thanks, **Dr. K. R. Santha, IEEE Counselor and Vice Principal**, expressed her appreciation to the chief guest for his valuable time, inspiring insights, and for motivating and engaging the students throughout the session.

Overall, the webinar proved to be highly beneficial and enriching for all the participants. It successfully created awareness about Artificial Intelligence, emerging industrial expectations, and the importance of continuous learning and skill enhancement to thrive in the evolving technological landscape.

Respected Sir,

Subject: Request for permission to organize online guest lecture- Reg.

The IEEE student branch is planning to organize a webinar titled "AI unleashed Industrial Trends, Skills, and Opportunities" during second week of February 2026. We believe that this lecture will greatly benefit the students and motivating them to explore the emerging fields of engineering and technology. We request the permission may be accorded for conducting the above program and sanction amount of Rs 3,000 for expenditure.

NBA Norms:

- Criterion 4.5.1 – Professional Activities: Organizing events under Professional Society/ Chapters carries 20 marks

NAAC Norms:

- Criterion 5.3- Student participation and activities carries 30 marks

In line with the above quality benchmarks, IEEE Student Branch has proposed to organize events during year 2025-2026 and got approval for the same.

Budget Details:

Total Budget allotted (AY 2025-2026)	Rs.38,000/-
Amount Spent so far	Rs.9,490/-
Remaining Amount	Rs. 28,510/-

In view of the above, we kindly request you to approve the release of Rs.3000/- from the allocated amount.

K.R. Santh
4.2.26

Dr. K.R. Santha, Professor,
Dean Research
IEEE SB, SVCE- Counselor
